

PRATHAM MANDAVKAR

Full Stack Developer | React.js, Next.js, React Native, Node.js, TypeScript, AWS

Mumbai, India | +91 88303 33610 | prathammandavkar932@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with 2.6+ years of experience building scalable, user-focused web and mobile applications for fast-paced fintech startups. Skilled in React.js, Next.js, React Native, Expo, and TypeScript, with backend experience in Node.js, Express.js, and message-queue systems (RabbitMQ, Redis). Hands-on experience managing AWS cloud infrastructure (EC2, S3, SES, CloudWatch, Security Groups) for reliable, scalable application deployment. Proven track record delivering complex fintech workflows including KYC/CKYC verification, e-signature processing, and loan aggregation across web, iOS, and Android platforms.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL

Frontend: React.js, Next.js, React Native, Expo, Redux, Redux Toolkit, RTK Query, Redux Persist, Tailwind CSS, NativeWind, Material-UI, Ant Design, Chakra UI

Backend: Node.js, Express.js, REST APIs, RabbitMQ, Redis

Databases: MongoDB, PostgreSQL, SQL, Supabase

Cloud & DevOps: AWS (EC2, S3, SES, CloudWatch, Security Groups), Firebase, Vercel, Netlify, PM2, Git

Mobile & SDKs: Firebase FCM, Firebase Crashlytics, Firebase Analytics, Facebook SDK, App Store, Google Play Console

PROFESSIONAL EXPERIENCE

Frontend Developer | SwitchMyLoan

May 2025 – Present | Mumbai, India

- Built and maintained a cross-platform fintech loan-aggregator mobile application using React Native, Expo, and TypeScript, serving iOS, Android, and Web users.
- Developed secure authentication flows including OTP, MPIN, and biometric login, with SSL pinning, root/jailbreak detection, and secure token storage.
- Architected scalable state management using Redux Toolkit, RTK Query, and Redux Persist with offline caching support.
- Designed a backend pipeline for high-volume Excel-based lead processing using RabbitMQ and Redis, implementing rate limiting and batch processing for stability under load; built a reusable producer-consumer framework to standardize vendor integrations and accelerate onboarding of new lending partners.
- Managed AWS infrastructure including EC2 instance configuration and access, S3 buckets for lead-data storage, SES for transactional emails, CloudWatch for monitoring, and security group rules for instance access.
- Configured PM2 process management (auto-restart, memory limits) to maintain application stability and uptime.
- Developed complex fintech workflows including KYC/CKYC verification, e-signature document signing, and mutual fund loan processing.
- Integrated Firebase Crashlytics and FCM for crash monitoring and push notifications; set up dual analytics (Firebase + Facebook SDK) tracking 100+ events across critical user journeys.
- Built and deployed high-performance Next.js websites for Rapid Money and Cready, including a custom CMS for faster content updates and reduced developer dependency.

React.js Developer | WDI

Jul 2024 – Feb 2025 | Mumbai, India

- Designed and launched the company's main landing page and additional high-conversion landing pages with responsive, cross-browser design.
- Built multiple web applications in React.js, integrating Chakra UI for accessible, cohesive user interfaces.
- Managed application state using Context API and Redux Toolkit, ensuring smooth data flow across components.
- Identified and resolved bugs to improve application reliability and reduce downtime.

React.js Developer | Agarwal Packers and Movers

Nov 2023 – Jun 2024 | Mumbai, India

- Designed and developed dashboards and portals for transportation management.
- Integrated Leaflet.js for real-time map interactions, improving operational efficiency.
- Delivered website redesign concepts that were selected and shipped to production.
- Managed the full deployment cycle, ensuring smooth delivery and performance.

KEY PROJECTS

Cready — Cross-Platform Loan Aggregator — *React Native, Expo Router, NativeWind, Redux, TypeScript, Next.js, PostgreSQL*

- Built scalable iOS, Android, and Web journeys for onboarding, authentication, loan aggregation, and mutual fund services.
- Engineered end-to-end loan workflows including CKYC/KYC verification, lending-partner integration, portfolio aggregation, and loan-against-securities modules.
- Developed the Cready web platform using Next.js and Tailwind CSS, implementing on-page SEO, JSON-LD structured data, and reusable UI components.

Rapid Money — Fintech Web Platform & CMS — *Next.js, Node.js, Express, MongoDB, Ant Design*

- Built a responsive fintech web platform with dynamic CMS-driven pages, blog content, EMI calculator, and loan landing pages, integrating SEO metadata and structured data.
- Developed a full-stack admin system with authentication, role-based access control, approval workflows, activity logs, and media uploads.

QuickFly — Shipment Tracking Platform (Freelance) — *Next.js, Tailwind CSS, Supabase*

- Built a full-stack shipment-tracking website with a real-time tracking system, interactive UI, and secure user authentication.

Pi-SuperMoney — Finance Dashboard (Freelance) — *React.js, Material-UI*

- Developed a responsive finance dashboard with Context API state management and integrated financial data visualizations.

EDUCATION

Bachelor of Commerce (B.Com) — Mumbai University, Mumbai

July 2022 – April 2023
